FRESH IDEAS & FAST INTERNET

MC / HOST: VICKI GROSSMANN

What happens when you bring local businesses, highly motivated & skilled students and fast internet together? Our speakers will highlight the great and at times somewhat unexpected results they achieved during their engagement with the iUnivariate program led by the University of Wollongong.

This year, the iUnivariate program partnered with Kiama Council to help local Kiama businesses capitalise on the availability of the region's National Broadband Network (NBN) to solve local business challenges. UOW Students brought fresh ideas to solve real business challenges for their Kiama 'clients', Burnett Trees, Droppoint and Kiama Council. Antonio Deliseo has years of experience in working with UOW graduates and he will share his experiences with us at the Lightning Talk too.

How could your company benefit from some fresh thinking and innovative ideas? Come and find out!
